### **Fight The Imperialist Attempt To Whip Up Counter Revolution In Socialist Cuba Lift The Inhuman US Blockade Against The Cuban People**

Economic adversity in Socialist Cuba, created by the economic blockade by US imperialism and its associates, has caused unrest, resulting in demonstrations by certain quarters among the people. At the same time, massive popular rallies also have hit the streets in support of the socialist government and the Communist Party of Cuba against any possible attempt of subversion of the socialist system. Still, the US led imperialist camp is now busy in supporting and publicising the demonstrations by those who oppose the socialist system with a view to gather international consensus in favour of a possible counter-revolution in Cuba.

We condemn this sinister imperialist project of sabotage and counter revolution being prompted by way of malicious intervention in Socialist Cuba even amidst the pandemic-stricken global situation. This imperialist move for counter-revolution is all the more condemnable especially because it is being advanced against the Socialist Cuba that is doing exemplary service helping other countries in the fight against Covid 19 pandemic.

The economic adversity that the Socialist Cuba faces, especially after the fall of the Soviet Union and the socialist setback, is mainly due to the blockade imposed by the US that has been on for more than six decades. The sanctions were intensified in the wake of the Covid 19 pandemic by the US in the most inhuman way, heinously categorising Cuba to a 'State sponsoring terrorism'. The Trump administration added 243 sanctions causing denial of import of food, inputs for the production of medicines, vaccines and lifesaving medical equipments. This has driven the life of Cuban people to extreme tests. Imperialist advocates are working over time to spread disinformation and lies through platforms of social media along with the campaign in the mainstream media, as part of their attempt to whip up unrest in the Cuban society.

Fighting all these odds, the Socialist Government in Cuba succeeded in developing vaccines for covid 19, which is now being exported to other nations, helping the global community in the fight against the pandemic.

So, we affirm our solidarity with Socialist Cuba and the people of Cuba in the fight against the US imperialist attempts to whip up unrest, destabilize the socialist system and ultimately to engineer a full-scale counter-revolution.

We call upon the left and democratic forces, the proletariat and the toiling masses close ranks in solidarity with Socialist Cuba and its heroic people in this historic hour to fight and defeat imperialist designs in order to safeguard their nation and the socialist system.

*(Signed)*

**MS Jayakumar,  
General Secretary.**
